

Criteria Used For Creating Scenarios:

- 1) District boundaries should conform to Census Geography
- 2) District population counts should be within 5% of each other
- 3) Overall shape of district boundaries should be contiguous
- 4) Changes to existing districts should be minimized to reduce dislocation of constituents
- 5) Consideration should be given for areas of growth
- 6) Recognition that certain districts will grow faster than others
- 7) District boundaries should conform to existing voting precincts where possible
